Tyler Cox

Software Engineering Internship Candidate | Full-Stack Product Engineer

Columbus, OH | Tyler.cox66@yahoo.com | linkedin.com/in/tyler-cox-53b886406 | github.com/TyCodes101 | tyler-portfolio-site.vercel.app

SUMMARY

Full-stack engineer at The Ohio State University building AI-powered consumer applications with conversational interfaces, modern web architecture, and production deployments. Experienced designing user-focused products using React, Next.js, TypeScript, PostgreSQL, and OpenAI APIs with emphasis on mobile UX, reliability, and real-world usability.

EDUCATION

The Ohio State University — B.S. Computer Science & Engineering

Expected May 2027 | GPA: 3.1 | Columbus, OH

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, responsive UI, mobile-first design

Backend & Data: Node.js, PostgreSQL, Prisma, REST APIs, full-stack application architecture

AI & Product Engineering: OpenAI APIs, conversational AI systems, structured outputs, intent classification, prompt engineering, UX-focused product design

Tools & Platforms: Git, GitHub, Vercel, Excel, Outlook, Workday

PROJECTS

Calorie Compass — AI-Powered Calorie and Macro Tracking App

Next.js, TypeScript, PostgreSQL, Prisma, OpenAI APIs, Vercel | calorie-compass-chi.vercel.app | github.com/TyCodes101/calorie-compass

- Engineered a deployed full-stack nutrition tracking platform with conversational meal logging, macro tracking, and a mobile-first dashboard.
- Designed structured AI interaction flows supporting food corrections, quantity changes, clarification handling, and active meal state management.
- Built a trust-focused nutrition pipeline separating verified food data from AI-estimated values to improve transparency and user confidence.
- Improved usability through responsive dashboards, streamlined logging flows, and reduced-friction meal entry interactions.
- Maintained live production deployments and environment configuration using GitHub and Vercel workflows.

Stride Fitness — Fitness / Productivity Web App

React, Next.js, responsive frontend, UX-focused product design | stride-step-tracker-tyler-cox-s-projects1.vercel.app

- Built and deployed a fitness-focused web app centered on step tracking, progress visibility, and daily habit feedback.
- Designed responsive user flows across desktop and mobile devices with readable progress states and intuitive navigation.
- Focused on clean UX patterns, lightweight interactions, and practical daily usability.

EXPERIENCE

Resident Advisor — OSU Housing, The Ohio State University

- Supported a residential community of 400+ students through conflict response, student support, policy communication, and operational follow-through.
- Documented incidents, escalations, and housing updates accurately while following university procedures and privacy expectations.
- Coordinated safety practices, resident communication, and community expectations within a high-responsibility student leadership role.
- Responded to on-call situations requiring professionalism, fast decision-making, and effective communication.

Office Assistant — OSU Housing, The Ohio State University

- Supported front-desk operations across student, family, and staff interactions with organized, service-oriented communication.
- Managed package, mail, scheduling, and administrative workflows using Excel, Outlook, and Workday.
- Maintained accurate records and handled sensitive information professionally in a fast-paced housing environment.
- Assisted with daily operational coordination to ensure timely and reliable housing services.
